**Sharing Projects and Adding Notes to Projects**

## Sharing Projects and Adding Notes to Projects

- The Share Icon can be found in several different locations throughout the site.
- When you hover your cursor over a project name the share icon will appear.

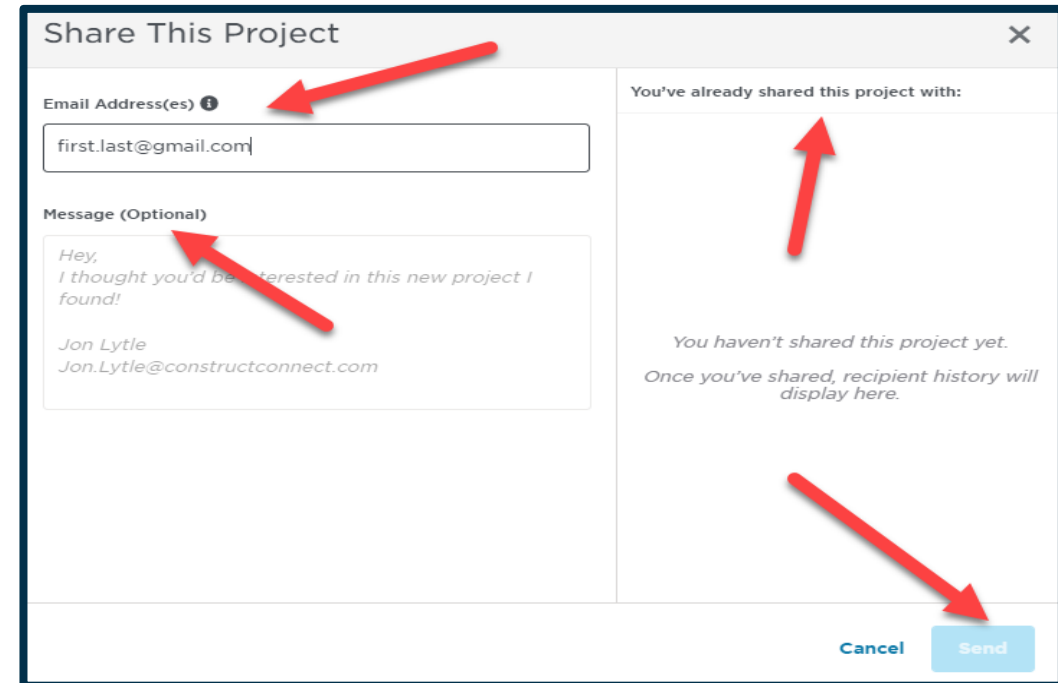

## Sharing Projects and Adding Notes to Projects

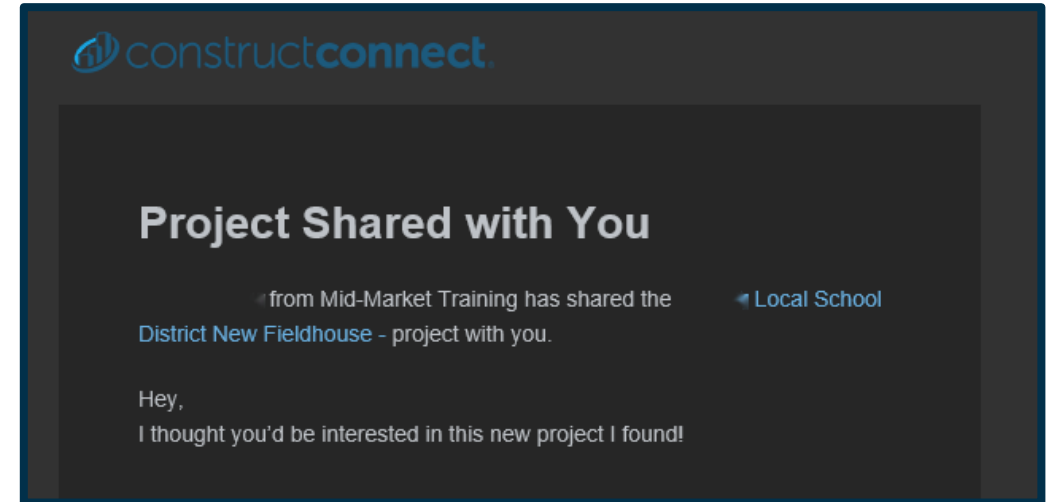

Inside a project the Share icon is in the upper right corner.

You can share each project with up to 5 email addresses at one time. Each of the recipients will be blind copied on that email. You can personalize a message to them and once you have started sharing projects, the system will let you know who you've already shared that project with.

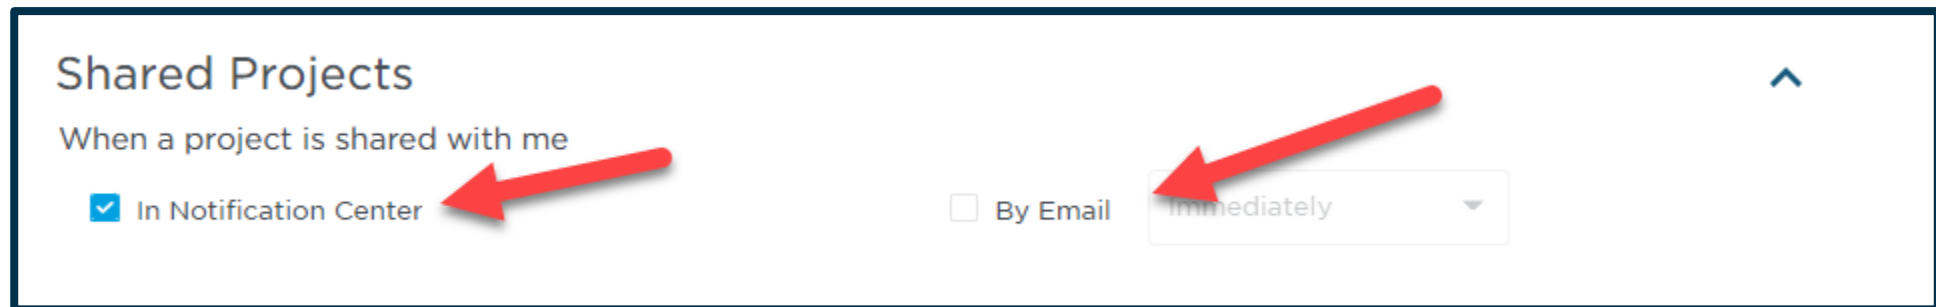

## Sharing Projects and Adding Notes to Projects

- If notifications are selected for your shared projects, an alert will be sent to your email.

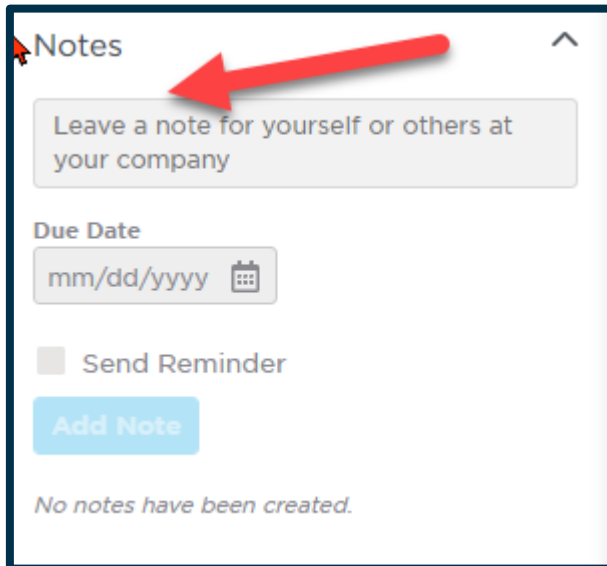

- Notifications for Shared Projects are turned on in Settings & Privacy.

## Sharing Projects and Adding Notes to Projects

- Our Customers can add notes to projects and contacts.

Notes

Leave a note for yourself or others at your company

Due Date

mm/dd/yyyy 

Send Reminder

[Add Note](#)

*No notes have been created.*

- When you leave a note on a project or company, those notes are completely private. Only yourself and others in your own company (with access to CC) can view those notes. Making them the best way to stay in contact with your team or even leave yourself reminder notes.
